

CORECEM™

TESTIMONIALS

Dr. Dan Ward,
Columbus, Ohio, USA

"This core material cuts more like dentin than any other material I have used."

Dr. Andrew Shannon
Vancouver, BC Canada

"I was quite pleased to see how this material stacks up when shaping the core, without any slumping. This made for more precise placement of the material."

**Dr. Alejandro Bertoldi
Hepburn**
Universidad Del Desarrollo
Dental School
Concepción, Chile.

"I used Corecem for cementation and core buildup, and found an excellent handling and radiopacity, much better than other core buildup composites I worked with. The skinny root canal delivery tips are also a "plus". Highly recommendable!"

Our fiber expertise is your strength

Dr. Gary Alex
Huntington, New York,
USA

"I found this product handled and performed well in clinical testing."

Dr. Christian Decloquement,
Former Assistant
Professor, University of
Paris VII, France

"Corecem is really very easy to manipulate. Its perfect viscosity allows a completely homogeneous reconstruction, and the hardness and surface make the shaping of the core build-up to receive the final crown easier"

Dr. Brian Gray
Washington, DC, USA

"Corecem is a strong core material that bonds well. We were also impressed with Corecem's ability to be placed without slumping. Once cured, Corecem cuts easily and is radiopaque for easy identification on x-ray images."

Dr. Prof. Daniel Torassa
Universidad Nacional de
Cordoba, Universidad
Catolica de Cordoba,
Argentina

"I prefer the stackability and handling of Corecem to other materials I have used for this purpose. Corecem is a very friendly material to use and solves both cementation and core build-up together."

Dr. Nicolas Cheleux
Former Assistant
Professor, University of
Toulouse, France

"I like Corecem because its consistency is outstanding. It is neither too runny nor too thick. The use of the system's very thin root canal tips facilitates easy injection into the root canal. Once polymerized, Corecem has a very good hardness and resistance."

Our fiber expertise is your strength

Dr. Mitch Conditt

Fort Worth Texas, USA

"Nice product; flows well - especially with the small root canal syringe tip - but does not flow too much."

Dr. Prof. Abelardo Baez Rosale

UNAB, Viña del Mar, Chile

"I enjoyed evaluating Corecem. It had very good dispensing and handling characteristics, and stayed where I placed it. It cut nicely, and looks good in the x-ray."

Dr. Prof. Simone Grandini

Tuscan School of Dental Medicine, University of Siena, Italy

"I found this product to be a very good cement and build-up material. Handling and radiopacity are good, and the small delivery tips are extremely user-friendly."

Dr. Mark Pitel

Colombia University College of Dental Medicine, New York City

Private Practice, Poughkeepsie, New York, USA

"I enjoy using Corecem Illusion in my practice because it couldn't be any easier to dispense, cuts just like dentin, and the on-demand blue color shows me exactly where the core margins are while I'm prepping."

Tony Pensak, DDS,

General / Aesthetic Dentistry, Calgary, Alberta, Canada

"Corecem not only enhances clinical efficiency by allowing one to cement a post and build up a core with the same outstanding material, but the color change feature also completely solves the problem of visualizing the core in sub-gingival preparations, without compromising esthetics. I highly recommend Corecem Illusion."
